This Screening Is In Memory of Bailey Bernard Bullock

Bailey Bernard Bullock
1/14/2005 - 5/12/2021

WHAT IS A HEART SCREENING?

Sudden cardiac arrest takes the lives of thousands of children every year. It is the #1 cause of death for student athletes. It kills more adults than lung cancer, breast cancer, and AIDS, combined. But, that's it. It is not enough.

- 1 Complete short medical history and consent form.
- 2 Evaluate blood pressure, height and weight.
- 3 Listen to heart; and receive electrocardiogram.
- 4 Some students will receive an echocardiogram, if needed.

WHAT IS SUDDEN CARDIAC ARREST?

The heart stops beating, suddenly and unexpectedly. Blood stops circulating through the body and a person collapses.

WHAT ARE THE WARNING SIGNS?

Sometimes warning signs happen and sometimes they don't.

Watch out for:

- Fainting or seizures during exercise
- Unexplained shortness of breath
- Rapid heart rate
- Extreme dizziness or fatigue
- Unexplained sudden death in family (SIDS, drownings and auto accidents)

ABOUT BAILEY'S HEART AND SOUL FOUNDATION: Bailey died suddenly of cardiac arrest after an organized track and field event on May 12th, 2021. Bailey was an avid athlete who played football, basketball, and ran track. Bailey's premature death motivated us to develop an organization to give knowledge to our community on how to respond to cardiac emergencies.
